## **DETAILED ACTION**

### ***Election/Restrictions***

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-14, 20, and 41-47, drawn to a modified oilseed material and food containing same, classified in class 426, subclass 656.
- II. Claims 15-19 and 21-40, drawn to a process for preparing a modified oilseed material, classified in class 426, subclass 656.

The inventions are distinct, each from the other because of the following reasons:

Inventions II and I are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case, the product may be produced by a process wherein protein is chemically precipitated and removed and/or wherein the oilseed material is pasteurized prior to any other processing steps..

Because these inventions are distinct for the reasons given above and the search strategy required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

Art Unit: 1761

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
